

Hugh Blaschko Fellowships 20th Anniversary Meeting

Thursday 24 April 2014
Department of Pharmacology, Mansfield Road, Oxford

9.30	Peter Somogyi, Department of Pharmacology, University of Oxford Welcome and Introduction: 20 years of The Hugh Blaschko European Research Fellowship
9.40	David Smith, Department of Pharmacology, University of Oxford Hugh Blaschko: the man and the scientist
10.00	Hans Winkler, University of Innsbruck Looking back as a pharmacologist: Hugh Blaschko, chromaffin granules and drug markets
10.30	Les Iversen, Department of Pharmacology, University of Oxford Novel psychoactive drugs: Applied monoamine pharmacology
11.00	Refreshments, Seminar Room
11.30	Linda Katona, MRC Anatomical Neuropharmacology Unit Behaviourally-defined dynamics of GABAergic neurons in the rat hippocampal chronocircuit
11.40	Gabor Tamas, University of Szeged, Hungary Functional assessment of neocortical interneurons in vitro and in vivo
12.10	Amy Pooler, Kings's College, London Propagation of protein aggregates in Alzheimer's disease
12.30	Leah Herrgen, Department of Pharmacology, University of Oxford Calcium-dependent tissue contractions expel damaged cells from the developing brain
12.50	Lunch, Common Room
14.30	10th David Smith Lecture in Anatomical Neuropharmacology <i>Zoltan Nusser, Hungarian Academy of Sciences, Budapest</i> Molecular, functional and structural heterogeneity of central synapses
15.30	Refreshments, Seminar Room
16.00	Eef Hogervorst, Loughborough University From postdoc to professor: the importance of a good mentor?
16.15	Laura Conforti, University of Nottingham Blaschko visiting scholarship, positional cloning and nerve survival
16.30	Gunes Unal, MRC ANU, Department of Pharmacology, University of Oxford Basal forebrain innervation of the hippocampus and entorhinal cortex in the mouse
16.45	Closing remarks
